

A Space You Can Work With

Whether it's a little nook or an entire room, never underestimate the potential of your workspace. Here are a few items that will organize and inspire you.

1. Your **desk** is the foundation of your space so find one that's both lightweight and neutral. That way, when your style changes, your desk won't have to. Neutral colours will also add a touch of tranquility.
2. Choose your **chair** based on the three "F"s - flow, function, and focal point. A decorative chair will meet all of these marks, compliment the rest of your home, and provide great back support at your work station.
3. Good **lighting** will only lead to more brilliant ideas. Keep the brightest ones on your desk for when you need to get down to business. Try **chic floor lamps** to soften the overall space and make it warm and inviting.
4. Storage is essential in helping you stay organized. **Decorative storage** and **desk organizers** will hide what you don't want to see and unify the space.
5. A **bulletin** or **corkboard** will keep your most important projects top-of-mind. It's also a great place to put up your kid's artwork, so you can smile even when you're at your busiest.
6. Don't forget to add a personal touch. Carve out your signature style with an **ornamental wall clock**, **cozy area rug** and some **unique frames**. Group your collections for maximum impact.

Above all, have fun decorating. Your workspace should be a peaceful place that makes you feel relaxed and productive.
